#### **NAME**

psprint – print various types of files to a PostScript printer

## **SYNOPSIS**

psprint file ...

## **DESCRIPTION**

The **psprint** script invokes various helper programs, including **groff**, **gs**, **enscript**, **gzcat**, **zcat**, and **lpr** to format various types of files and print them to a PostScript printer.

#### **FILETYPES**

The following types of files are supported:

```
*.c *.h *.cpp *.hpp *.C *.H *.cc *.cxx *.hxx *.c++ *.h++ *.m *.i *.ii *.s *.S C, C++, Objective-C, and Assembler source files.
```

\*.pdf

PDF documents.

\*.pdf.gz

Gzipped PDF documents.

\*.pdf.Z

Compressed PDF documents.

\*.ps \*.eps

PostScript files.

\*.ps.gz \*.eps.gz

Gzipped PostScript files.

\*.ps.Z \*.eps.Z

Compressed PostScript files.

\*.java

Java source files.

\*.[1-9]\* \*.man
